

The People's Strike:

A Day of Non-Compliance and Resistance

October 1st, 2002

In direct opposition to the International Monetary Fund, the World Bank and all they represent we will shut down Washington DC on the first day of their Fall Meetings. These institutions exemplify how global capitalism promotes poverty, racism, sexism, environmental destruction, and the concentration of power and wealth in the hands of a few. We are calling for creative, confrontational opposition to capitalism and the crippling effects it has here in DC and around the world. This time around we are not just shutting down the meetings but extending our protests to disrupt all of the institutions headquartered in DC that play a part in this system.
